 TOLL FREE 1-888-RED-LAKE (733-5253)

SERVICE

Established in 1985, Anderson Electric is owned and operated by Lac Seul First Nation members Ken and Casey Anderson.

We have been serving Red Lake and all northern communities for 37 years. Our work includes industrial, commercial, residential, and powerline work. With our recent purchase of Energy Tech (Red Lake division) we can now offer all of our customers plumbing and heating services as well as natural gas and fuel oil installations.

Our lasting presence in northern communities serves as evidence that a strong working relationship with our customers remains our number one priority. We have always welcomed the opportunity for northern community members to learn from our trade. Our long-term hope is to see the trainees in the communities employed in all the trades, including electrical, data & fiber optics, and carpentry.

Anderson Electric has 15 - 100 employees depending on the construction work in the area. Our recent completion of the Pure Gold mill resulted in us hiring 65 men to meet the project timelines.

We thank the Wataynikenayap Power Transmission Line Project for the opportunity to work on the Red Lake Substation with Barren Transportation and complete the electrical installations at two Valard camps.
