

## Subcontractor Profile

NCPC General Partners Limited (NCPC) is a partnership between North Caribou Lake First Nation and Perron Contracting. NCPC is committed to efficient completion of their Wataynikaneyap contracts, while preserving the rights of all the northern First Nations.

Darren Corbiere is the owner of Perron Contracting and has 29 years of experience working in Northern Ontario communities. Throughout his career he has seen many partnerships formed between companies and Northern communities, including in his early years as an employee for various contracting companies.

Improving on these relationships has always been Darren's goal. At Perron Contracting, communication is paramount to their operation; listening to the needs of the community while respecting the land and their partners wishes. This has allowed Perron Contracting and North Caribou Lake First Nation to forge a true partnership that is a model for the future: NCPC.

While the partnership between North Caribou Lake First Nation and Perron Contracting was born as a result of the Wataynikaneyap Transmission Project, it has developed into a relationship where both entities support and respect each other in ways that go far beyond business.

*Many years of experience on ice roads and in difficult conditions.*

**NCPC is Northern Ontario's largest Contracting Company that is 100% First Nations owned.**

NCPC works on many aspects of the Wataynikaneyap Transmission Line Project. NCPC has:

- Created **Access Roads**,
- **Cleared 500 Ha of Right of Way** in Section CD,
- **Cleared the North Caribou Lake Substation area**; and
- Begun mobilization for the **North Caribou Lake Construction Camp**.

*NCPC has accomplished this while maintaining the wishes of the community by **saving 2073 cords of firewood from the Right of Way**. NCPC processed this wood and delivered it to North Caribou Lake First Nation to supply the community with heating for the winter.*

NCPC is also working closely with the community to find ways to train and employ community members and to develop a strong work force, as the goal is to continue the partnership beyond the Wataynikaneyap Project.
